Deja-Vu? Been here before? Met a stranger who you feel you already know? The longing to travel to a particular place? An irrational fear?

Perhaps you have an outstanding skill that you have never been trained in. Where does this all come from? Curious?

Past Life Regression is a hypnotic experience where the individual may see, sense, feel, hear, situations from another time and place, enabling them to shed light on some of these mysteries. Exploring your past lives may enable you to bring insights into your current life.
